

# WORK2017

Work and Labour in the Digital Future

16–18 August 2017 Turku, Finland

## **CHANGING MODES OF DIGITALISATION AND ITS IMPACT ON WORK**

Chairs: Docent Ismo Kantola, University of Turku, FI; Assistant professor Nina Helander, Tampere University of Technology, FI

The knowledge work –discussion has a long history in studies of working life. Knowledge can be seen as inherently part of any work task, irrespective of the work or its organizational form. Digitalization as part of new types of knowledge work is increasing and entering such areas of work that were previously organized in different ways. Empirical studies of new knowledge work and new digitalized work are especially welcomed to this stream.

The stream especially welcomes papers that relate to the themes described above. If you wish to propose a session within the stream, that is, 3-4 papers tied together with specific focus or theme, the organizers will try to accommodate them in the programme.
