

# WORK2017

Work and Labour in the Digital Future

16–18 August 2017 Turku, Finland

## EDUCATION, WORK, EMPLOYMENT

**Chair:** PhD Annukka Jauhiainen and Adjunct professor Anne Laiho, University of Turku, FI

Education is crucial for work in several ways. This stream focuses on the interplay between education and working life. This track invites papers on various aspects of learning-work relations, such as: the transition from school to work, the array of continuing and informal learning activities in work organizations, education as a means to enhance job quality and to prolong working careers, and the systemic underemployment of learning capacities in relation to class, gender, cultural, generational and other social differences.

The stream especially welcomes papers that relate to the themes described above. If you wish to propose a session within the stream, that is, 3-4 papers tied together with specific focus or theme, the organizers will try to accommodate them in the programme.
