

WORK2017

Work and Labour in the Digital Future

16–18 August 2017 Turku, Finland

ORGANISATIONS AS PLATFORMS OF WORK IN THE DIGITAL FUTURE

Dr.Econ.Sc. Anni Paalumäki and Dr. Econ.Sc. Maija Vähämäki, University of Turku, FI

This stream invites contributions dealing with work and labor in organizations of the digital age. What do the changing ways of work mean for our current social structures and geographies of workplaces and organizations? How does technology and digitalization change structures, boundaries, organizational cultures and identities? What is expected from organizations to be able to provide a platform for good work, inspiring work communities and a sustainable society in the future? What kind of opportunities for communication, agency, or resistance does the digital age provide in organizations? Discussions ranging from global to local levels, or tensions between them, are welcome.

The stream invites papers that relate to the themes described above. If you wish to propose a session within the stream, that is, 3-4 papers tied together with specific focus or theme, the organizers will try to accommodate them in the programme.
