

WORK2015 – Digitalization at work

Chairs:

Ismo Kantola, University of Turku, FI

Nina Helander, University of Vaasa, FI

The knowledge work –discussion has a long history in the studies of working life. Knowledge can be seen as inherently part of any work task, irrespective of the work or its organizational form. Digitalization as part of the new type of knowledge work is increasing and entering such areas of work that were previously organized otherwise. Empirical studies of new knowledge work and new digitalization work are especially welcomed to this stream.

Wednesday, 19 August, at 15.30-17.30 - Session 3

4.01

Online Games and the Social Organization of Workplace Authority in Sales and Service Work

Asaf Darr, Israel

4.02

My Digital Day – explaining digital working schemes of knowledge workers from the perspective of information ergonomics

Jussi Okkonen, Finland
